## PROFESSIONAL EXPERIENCE

**Corey Johnson for NYC Comptroller** | New York, NY

Apr 2021 - Present

### Data Fellow

- Launched data systems for relational campaign: cleaned data for bulk upload, created automatic field PTG, published precinct-level turfbook, standardized data handling for organizers and directors

**Democratic Party of Georgia** | Atlanta, GA

Nov 2020 - Jan 2021

### Field Organizer

- Mobilized over 100 vols via phone & text to register and educate voters in voter-suppressed precincts
- Leveraged VAN, voter data, and community connections to identify and reach key neighborhoods
- Consistently met organizing goals for shifts, packets, and dials by investing in existing local leaders
- Recruited and trained five organizing interns; three were hired as full-time staff by election day
- Ran lit drops and canvasses to drive record turnout in Dekalb County and flip the U.S. Senate

**Democratic Party of Iowa** | Cedar Rapids, IA

Jul - Nov 2020

### Field Organizer

- Created tools for GOTV that saved hrs of work for organizers around the state, such as:
  - A system of G-sheets to track phone bank volunteers: leaders collaborated on vol confirms/chase; organizing directors monitored live via dashboard; organizers refreshed from a VAN export in <5 min
  - Dashboards for turf directors that calculated metrics live, replacing slow/inaccurate manual counts
  - A central database where my vols' relational progress was automatically aggregated for review
- Managed autodialer for Iowa's first congressional district: Built, trained, and supervised a team of organizers and vols that completed nearly 1000 shifts of voter contact calls with Thrutalk and HubDialer.
  - Coached trainers so that vols reached 10,000s of key IA-01 voters to inform, connect, mobilize.
- Consistently met goals for recruitment, escalation of vol leaders, reshifts
- Helped drive record Democratic early voting to flip the White House

**TruckWings** | Redwood City, CA

### Manager - Customer Success and Field Engineering

2018 - 2020

- Reported to CEO on customer strategy, product performance, & data analytics
- Made digital tools with python APIs and G-sheets to track, predict, and manage product faults
- Used pandas, numpy, and PowerBI to clean, analyze, present data in permanent dashboards
- Analyzed and presented customer data trends internally & externally
- Supervised a team of technicians that completed 100s of repairs/month, across the US

### Lead - Engineering

2015 - 2018

- First employee—recruited and hired our first six engineers, built org alignment on processes
  - Project-managed real-world highway testing, factory production in several states & Mexico
- 

## SKILLS

### Technical

- Sheets, SQL/BigQuery, Data Studio
- Python API intern at Terraverde Renewables
- VAN admin; report automation

### Languages

- Spanish (conversational)
- French (fluent)

### Traits & Interests

- Eager for feedback to learn and grow
  - Organizer mindset: scrappy, solution-driven
  - Analytical decision-maker in all realms
  - Experienced public speaker
  - Team player with strong EQ
  - Dedicated to inclusivity at work
- 

## EDUCATION

**University of California, Davis** B.S. Mechanical Engineering '14
